Re: Handling and Storage of Fuel

At the February 11th SPC meeting, we will be reviewing the Drinking Water Source Protection Background Document on *the handling and storage of fuel*. Based on your feedback and other local input, this will evolve into the Thames-Sydenham discussion paper on fuels.

In the package for the January 14, 2011 meeting, a bulletin from MOE was provided entitled: “*Source Protection Planning Bulletin – Technical Standards and Safety Authority*.” This MOE bulletin provides information that is important to consider in our discussions for *the handling and storage of fuel* threat. Please take the time to read both the MOE bulletin and the Drinking Water Source Protection Background Document.

Thank-you,
Ingrid Vanderschot
