

Glossary Suggested Changes

Staff have been keeping a log of all changes to date to the Glossary. These changes are colour coded to make review and discussion easier. Please refer to the legend below. Not all sections in the table will be reviewed during the meeting. Staff have selected sections to review that are most representative of the changes being made and/or may generate discussion. These section #'s are highlighted in **dark green**. Please feel free to request additional section #'s for discussion as we go through the table.

Legend

White Cells- original policy text

 - new policy text

 - area of original policy text to be changed (not yet reviewed by SPC)

 - area of new policy text (not yet reviewed by SPC)

 - policy selected for discussion at SPC meeting

EBA	• Event Based Areas	New entry
	•	
Event Based Areas	<ul style="list-style-type: none"> In the Thames-Sydenham and Region, Event Based Areas (EBA) are the areas within the Intake Protection Zones (parts of IPZ-1, IPZ-2, IPZ-3) where event-based modelling has demonstrated that a spill can reach the intake at a concentration which would deteriorate the water for the purposes of drinking. Event-based modelling involved the use of specific event which was not to exceed an extreme event as defined by the Technical Rules Each EBA is associated with a specific contaminant, and quantity. The spills modelled may be the result of the local threat activity (transportation) or it may be the result of a similar prescribed drinking water threat (storage or handling). Within the EBA these activities are identified as SDWT under the circumstance (volumes) modelled. 	New entry
	•	
Extreme event	<ul style="list-style-type: none"> A period of heavy precipitation or winds up to a 100 year storm event; a freshet; or a surface water body exceeding its high water mark(Technical Rules³). An event up to an extreme event is used for event-based modelling 	New entry
Groundwater Under the Direct Influence	<ul style="list-style-type: none"> means groundwater having incomplete/undependable subsurface filtration of surface water and infiltrating precipitation (See website: http://www.ene.gov.on.ca/envision/techdocs/4167e.htm) generally used to refer to groundwater that shows physical evidence of surface water contamination or surface water organisms (See website: http://www.ene.gov.on.ca/envision/techdocs/4167e.htm)
