

List 3 - Policies Organized by Municipalities

This list contains policies that apply within a municipal boundary regardless of the body responsible for implementing those policies. Municipalities and other implementers may wish to cross reference policies in this list with the policies listed by implementer in List 2 to determine policies that they are responsible for implementation within a given municipal boundary.

Although reasonable efforts have been made to confirm the accuracy of this list, this list does not affect the legal responsibility for implementing a policy. Policy text included in an approved Source Protection Plan and vulnerable areas identified within an approved Assessment report determine the applicability of a policy. All policies in this list are also subject to their corresponding monitoring policies found in Appendix A - List F.
